

Dear Families,

This notification is to advise you of the occasional need of the District to apply pesticides, such as for weed control, to certain areas of its facilities. While we have over the past several years significantly reduced our pesticide application program, we do have some need. In no case do we regularly apply pesticide for weed control, but rather on an as-needed basis on grounds/facilities (fence lines, cracks in concrete, etc.). Pesticides are applied according to Shoreline's established district procedures for such pest control measures.

Pesticides are applied only by Washington State licensed District employees, or commercial applicators.

Information regarding pesticide use including an annual summary is available at the conclusion of each school year, in the District Maintenance office at the Shoreline Center.

Reprinted below is a portion of the law, specifically, Washington State RCW (17.21.415) which describes school districts' processes for notification of pesticide use. Please note that the term "school" as indicated, implies "school district", not a specific school to carry out this legal responsibility.

Finally, it is the practice of our District that if pesticide use is necessary, such application occurs during summer and other school vacation periods during the year, except for occasional applications required as soon as possible.

Thank you,
Shoreline Maintenance Department

RCW 17.21.415 requires a school to:

1. Establish a notification system that, as a minimum, notifies interested parents or guardians of students and employees at least forty-eight hours before a pesticide application to a school facility.
2. The notification system shall include posting of the notification in a prominent place in the main office of the school.
3. All notifications to parents, guardians, and employees shall include the heading "Notice: Pesticide Application" and, at a minimum, shall state:
 - (a) The product name of the pesticide to be applied;
 - (b) The intended date and time of application;
 - (c) The location to which the pesticide is to be applied;
 - (d) The pest to be controlled; and
 - (e) The name and phone number of a contact person at the school.
4. A school facility application must be made within forty-eight hours following the intended date and time stated in the notification or the notification process shall be repeated.
5. A school shall, at the time of application, post notification signs for all pesticide applications made to school facilities unless the application is otherwise required to be posted by a certified applicator under the provisions of RCW 17.21.410(l)(d).
 - (a) Notification signs for applications made to school grounds by school employees shall be placed at the location of the application and at each primary point of entry to the school grounds. The signs shall be a minimum of four inches by five inches and shall include the words: "THIS LANDSCAPE HAS BEEN RECENTLY SPRAYED OR TREATED WITH PESTICIDES BY YOUR SCHOOL" as the headline and "FOR MORE INFORMATION PLEASE CALL" (all capital letters) as the footer. The footer shall provide the name and telephone number of a contact person at the school.

Please Note: primary points of entry are defined as the most common pathway or driveway to school grounds.
 - (b) Notification signs for applications made to school facilities other than school grounds shall be posted at the location of the application. The signs shall be a minimum of 8.5 X 11 inches in size and shall include the heading "Notice: Pesticide Application" and, at a minimum, shall state:
 - (i) The product name of the pesticide applied;
 - (ii) The date and time of application;
 - (iii) The location to which the pesticide was applied;
 - (iv) The pest to be controlled; and
 - (v) The name and phone number of a contact person at the school.
 - (c) Notification signs shall be printed in colors contrasting to the background.
 - (d) Notification signs shall remain in place for at least twenty-four hours from the time the application is completed. In the event the pesticide label requires a restricted entry interval greater than twenty-four hours, the notification

sign shall remain in place consistent with the restricted entry interval time as required by the label. Schools are not liable for posters that are removed by unauthorized persons.

6. A school facility application does not include the application of anti-microbial pesticides or the placement of insect or rodent baits that are not accessible to children.
7. **The pre-notification requirements of this section do not apply if the school facility application is made when the school is not occupied by students for at least two consecutive days after the application.**
8. **The pre-notification requirements of this section do not apply to any emergency school facility application for control of any pest that poses an immediate human health or safety threat, such as an application to control stinging insects. When an emergency school facility application is made, notification consistent with the school's notification system shall occur as soon as possible after the application. The notification shall include information consistent with the normal pre-notification requirements.**
9. A school shall make the records of all pesticide applications to school facilities required under this chapter, including an annual summary of the records, readily accessible to interested persons.
10. A school is not liable for the removal of signs by unauthorized persons. A school that complies with this section may not be held liable to personal property damage or bodily injury resulting from signs that are placed as required.
