Introduction

Educational Effectiveness Survey, Student SEL Edition

While there is no single solution for all schools, research on effective schools identified common characteristics of high-performing schools known as the 9 Characteristics. Successful schools engaged in improvement activities focus on these characteristics of “organizational and educator capacity” to create and improve the system(s) that ultimately drive performance outcomes. Understanding the perceptions of your student population is essential to inform changes for improvement.

Note: The Characteristics, “Curriculum, Instruction, and Assessment” and “Focused Professional Development”, are professional activities conducted amongst the adult school community and are rarely viewed by students. Thus questions regarding those Characteristics are not a part of the survey and do not appear in this report.

Capacity for Improvement

-  "Context" defines the "current reality" of the student population, the school, and community.
-  9 Characteristics, or organizational and educator capacity defines the strength and capacity of the adult culture to implement the changes and structures defined in the 7 Principles.
-  The 7 Principles define the structure and systems essential at the school-level in order to increase student outcomes and achievement.
-  The "Improvement Readiness" defines the current capacity for change amongst the systems and adult culture of the school and district.
-  All four components impact the ability of the organization (school) to increase student performance.

The Youth Development for Education Results workgroup of the Road Map Project in King County, Washington developed the student engagement, motivation, and 21st century skills survey items based on the workgroup's research about student motivation and engagement and the skills and dispositions that matter most to school success. The Center for Educational Effectiveness was contracted by the workgroup as the lead research partner in the development of the items, the pilot testing, item refinement, and implementation of the survey items.
